BUSINESS UPDATE

Directors are pleased to announce that the company has secured a contract for the sale of an EMEW® electrowinning plant in the USA. An official purchase order has been issued and a substantial deposit is due to be paid shortly. Apart from the sale of the EMEW® plant, the company will supply engineering services for plant installation and commissioning, as well as initial spare parts, for a total value of approximately \$1.9 million.

The plant is to be used in an industrial application for the recovery of tin metal from the spent solution in a manufacturing process. This represents a new application for the company's EMEW® electrowinning process and the sale was secured after an extensive testing program on site at the customer's operations.
